

AMANA VAULT CONTRACTOR PORTAL PRD

Developer Build Guide

1. Product Overview

Purpose

Create a Construction Command Center where contractors manage builds from proposal to final handover.

Primary Users

Construction companies, builders and project managers with artisan teams.

Success Outcome

A contractor can receive a project, bid, manage workers, upload progress, complete milestones and receive protected releases.

2. Complete User Flow

Flow

Register → Verify Company → Create Profile → Browse Projects → Submit Bid → Client Accepts → Vault Funded → Construction Begins → Milestone Proof → Approval → Release.

3. Dashboard Screen

Components Needed

Metric cards, active project card, milestone tracker, team activity, alerts, recent updates and vault summary.

Actions

View project, add update, manage team, submit milestone, message client.

4. Project Marketplace

Project Card Fields

Project image, name, location, budget, timeline, client type, design documents available and bid status.

Actions

View build package, submit bid, save project.

5. Bid Creation

Required Inputs

Material cost, labor cost, equipment cost, contractor fee, timeline, team members and notes.

Purpose

Creates transparent pricing before the client funds the vault.

6. Team/Subaccount System

Roles

Engineer, electrician, plumber, carpenter, mason, supervisor.

Permissions

Contractor controls who uploads proof, updates progress and views financial information.

7. Active Project Management

Stages

Foundation → Structure → Roofing → Electrical/Plumbing → Finishing → Handover.

Required Features

Progress percentage, timeline, milestone status, documents and communication.

8. Milestones & Vault Logic

Milestone States

Pending → In Progress → Under Review → Approved → Released OR Disputed.

Vault Display

Contract value, protected funds, released funds and pending milestone amount. Avoid wallet terminology.

9. Files & Updates

Uploads

Site photos, videos, receipts, BOQ, reports, drawings and completion evidence.

Mobile Priority

Must work easily from construction sites with phone uploads.

10. MVP Checklist

Build First

Dashboard, marketplace, bidding, project center, team management, milestones, vault, messaging and documents.

Build Later

AI estimates, supplier marketplace, analytics and advanced reporting.
